ABOUT ME

Full-Stack Developer with 1.6 years of experience. Strong proficiency in Node.js, PHP, and MySQL. Skilled in converting complex concepts into functional, high-quality web applications that enhance business performance.

WORK EXPERIENCE

○ March 2024 – June 2024
Monarch Tech Solutions & Systems Pvt. Ltd.

Software Developer

Spearheaded web application development, focusing on backend development with PHP.
Collaborated closely with front-end developers for seamless integration and optimal performance.
Managed database operations, including schema design and optimization using MySQL.
Utilized version control systems like GitHub for code management and collaboration.
Project: Land Servey.
Description: Developed and maintained a web application for Bhumapan, enabling clients to access
property information and related services online. Utilized PHP for backend development, integrated with a MySQL database, and ensured a responsive user interface with HTML, CSS, and Bootstrap.

2022-2024
GRT Solutions

Software Developer

Developed and maintained RESTful APIs using Node.js and PHP.
Collaborated with front-end developers to integrate user-facing elements with server-side logic.
Designed and implemented database schemas using MySQL.
Debugged and resolved technical issues in a timely manner, ensuring minimal downtime.
Project: ERP (CRM)
Description: Contributed to the development of an Enterprise Resource Planning (ERP) system with Customer Relationship Management (CRM) features. Implemented key functionalities using Node.js and PHP, designed database schemas with MySQL, and collaborated closely with front-end developers to integrate user-friendly interfaces. Focused on improving business operations and customer management through seamless and efficient solutions.
